Question Label : Comprehension

Elmo finds himself at a Coke machine on a hot and dusty Sunday. The Coke machine requires exact change-two quarters and a dime. No other combination of coins will make anything come out of the machine. No stores are open; no one is in sight. Elmo is so thirsty that the only thing he cares about is how many soft drinks he will be able to buy with the change in his pocket; the more he can buy, the better.

Based on the above data, answer the given subquestions.

Question Label : Comprehension

Last week you purchased five large cases of Fritos for a customer who, as it turned out, did not accept delivery. You paid \$100 for these cases. You have a deal with your grocers that they will pay you \$0.25 for each dollar of returned merchandise. Just this week, you found a fraternity on campus that will buy the five cartons for \$55 (and will pick them up from your apartment, relieving you of the need to deliver them to the frat house).

Based on the above data, answer the given subquestions.
