Question Shuffling Allowed :

Yes

Question Number : 103 Question Id : 640653856872 Question Type : MCQ

Correct Marks : 1

Question Label : Multiple Choice Question

Choose the incorrect statement

Options :

6406532879167. ✗ Quasi linear preferences are linear in one good and non-linear in other good

6406532879168. ✓ Marginal utility does not change for a monotonic transformation of the utility function

6406532879169. ✗ MRS does not change for a monotonic transformation of utility function

6406532879170. ✗ All of these

Question Number : 104 Question Id : 640653856873 Question Type : MCQ

Correct Marks : 1

Question Label : Multiple Choice Question

Choose the correct alternative

Options :

6406532879171. ✗ The fraction of quantity tax paid by buyers rises as supply becomes more own-price elastic

6406532879172. ✗ The fraction of quantity tax paid by buyers rises as demand becomes less own-price elastic

6406532879173. ✓ Both The fraction of quantity tax paid by buyers rises as supply becomes more own-price elastic and The fraction of quantity tax paid by buyers rises as demand becomes less own-price elastic

6406532879174. ✗ None of these

Question Number : 105 Question Id : 640653856874 Question Type : MCQ

Correct Marks : 1

Question Label : Multiple Choice Question

Choose the correct alternative about a monopolist

Options :

6406532879175. ✗ A profit-maximizing monopoly will produce that output for which marginal cost equals marginal revenue

6406532879176. ✗ A natural monopoly occurs when one firm can supply the entire market more cheaply than can a number of firms

6406532879177. ✗ A monopolist always produces in the elastic region of market demand curve

6406532879178. ✓ All of these

Question Number : 106 Question Id : 640653856875 Question Type : MCQ

Correct Marks : 1

Question Label : Multiple Choice Question

Consider the following two statements:

I. Peak load pricing is a form of price discrimination.

II. It makes consumers worse off.

Choose the True statements:

Options :

6406532879179. ✓ I

6406532879180. ✗ II

6406532879181. ✗ I and II both

6406532879182. ✗ None of these

The demand and supply curves in a market are

$$Q^d = 10 - 0.5P^d$$
$$Q^s = \begin{cases} -2 + P^s, & \text{When } P^s \geq 2 \\ 0, & \text{When } P^s < 2 \end{cases}$$

where Q^d is the quantity demanded when the price consumers pay is P^d , and Q^s is the quantity supplied when the price producers receive is P^s . Suppose, the government imposes a price floor of \$12 in the market.

Based on the above data, answer the given subquestions.
